

Customer Shopping Behavior Analysis

Uncovering insights from 3,900 purchases to guide strategic business decisions

Dataset at a Glance

3,900

Total Purchases

Transactions analyzed

18

Data Points

Features per transaction

4

Product Categories

Clothing, Footwear, Accessories, Outerwear

50

Locations

Geographic coverage

Data Preparation Journey

01

Data Loading & Exploration

Imported dataset, checked structure with df.info() and summary statistics

02

Missing Data Handling

Imputed 37 missing Review Ratings using median by category

03

Feature Engineering

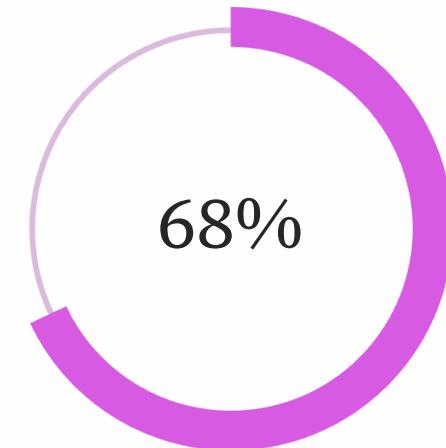

Created age_group bins and purchase_frequency_days columns

04

Database Integration

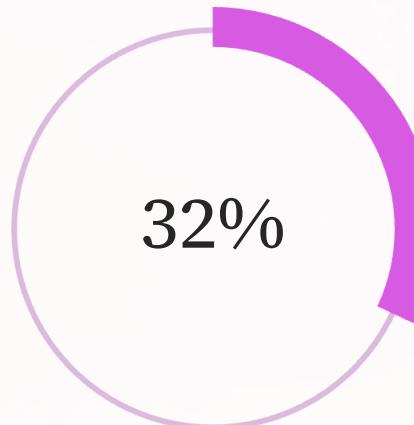

Connected to SQL Server Management System for advanced SQL analysis

Comprehensive Demographic Revenue Insights

Male Customers

of total revenue (\$157,890)

Female Customers

of total revenue (\$75,191)
